PROFILE

As a dedicated react developer I am eager to leverage my technical skills and creative insights to design and develop exceptional websites. With a strong passion for front end development particularly using React native, I am excited to explore opportunities in creating innovative and user-friendly web experiences. My goal is to contribute meaningfully to a dynamic team while advancing my career in this ever-evolving field.

EXPERIENCE

REACT DEVELOPER

isoftwarefactory | 2024–Present

Currently, I am working as a react developer at isoftwarefactory, where I am responsible for handling the entire frontend - from design to implementation. Over the past 5-6 months, I have gained extensive experience in react, mastering hooks, custom hooks, Redux for state management REST APIs, Axios and more.

Project : Trackofit

I am working on a product that aims to bring athletes and coaches together on one platform enabling coaches to train athletes effectively.

Key Contributions: User Authentication: Implemented secure user signup and sign-in functionalities using JWT tokens. Coach Enrollment: Developed a "Become a Coach" section, allowing users to upload a cover photo, profile photo, and a short video introducing themselves. Coaches can view and edit their profiles and add training plans in the "My Coaching Plans" section. Athlete Interaction: Enabled athletes to browse coach profiles, review their qualifications, and select their preferred coach.

Technical Proficiencies:
React Hooks: useState, useEffect, useContext, useMemo, useRef, custom hooks. State Management: Redux Toolkit. Styling: Tailwind CSS. API Integration: Axios.

WORKED AS A FREELANCER

2020-2023

1) Developed a static portfolio website for a prominent youth figure in Indian politics. Seamlessly integrated the individual's vision and values into the design, resulting in an engaging online platform that effectively communicates their initiatives, achievements, and goals. Successfully translated their personal brand into a captivating digital presence, contributing to increased visibility and engagement within the political landscape.

3) Designed and developed a visually appealing website for a resort in Goa. The website showcases the resort's unique features, amenities, and picturesque surroundings, offering a seamless user experience for potential guests. Implemented responsive design and user-friendly navigation to enhance accessibility across various devices.
